main.c

Share Run

```c
#include <stdio.h>
#include <stdlib.h>

struct Node {
int data;
struct Node* left;
struct Node* right;
};

struct Node* create(int x) {
struct Node* new = malloc(sizeof(struct Node)); new->data = x;
new->left = new->right = NULL;
return new;
}

struct Node* find_lca(struct Node* root, int n1, int n2) {
    if (root == NULL) return NULL;
if (root->data == n1 || root->data == n2)
return root;

struct Node* left = find_lca(root->left, n1, n2);
struct Node* right = find_lca(root->right, n1, n2);
if (left && right) return root;
return left ? left : right;
}

```

Output

```
LCA: 10

=== Code Execution Suc
```

```c
